
django-startcbv Documentation

Release 0.1

Audrey Roy

July 14, 2014

1	Contents	1
1.1	Installation	1
1.2	Usage	1
2	API/Reference Docs	3
2.1	Reference for startcbv app	3
3	Indices and tables	5

1.1 Installation

Add `django-startcbv==0.2.3` to `requirements.txt`, then just:

```
pip install -r requirements.txt
```

1.2 Usage

Create a `base.html` template in `templates/base.html`. It should contain a title and a content block, like this:

```
<html>
<head>
<title>
{% block title %}{% endblock %}
</title>
</head>

<body>
{% block content %}{% endblock %}
</body>
</html>
```

Add the “startcbv” app to `INSTALLED_APPS` in `settings.py`:

```
INSTALLED_APPS = (
    ...
    'startcbv',
)
```

For all of the following steps, replace “things” with the name of the app that you wish to create:

```
python manage.py startcbv things
```

If you’re done using `startcbv`, you can remove it from `INSTALLED_APPS` now; otherwise, leave it in to create more class-based view apps. Add your “things” app to `INSTALLED_APPS` in `settings.py`:

```
INSTALLED_APPS = (
    ...
    'things',
)
```

Add your “things” app URL pattern to `urls.py`:

```
url(r'^things/', include('things.urls')),
```

Then:

```
python manage.py syncdb  
python manage.py runserver
```

API/Reference Docs

2.1 Reference for startcbv app

The startcbv app gives you the management command “python manage.py startcbv things”.

2.1.1 startcbv management command
